AWS Certified AI Practitioner

Khushbu Pandit

Data Scientist | ML, AI & Data Engineering | Building Reliable,
Production-Ready Models

Chicago, Illinois, United States

Summary

I'm a Data Scientist with experience building end-to-end machine learning and AI solutions that improve decision-making, automate workflows, and deliver measurable business impact. My background spans data engineering, predictive modeling, NLP, and dashboard development, and I enjoy turning complex data into insights that teams can act on. I've worked across analytics, BI, and data science roles, partnering with cross-functional stakeholders to design scalable pipelines, develop production-ready models, and create visualizations that clarify trends and drive strategy. I'm motivated by solving ambiguous problems, learning new tools, and building solutions that make organizations more efficient and data-driven.

Technical skills include Python, SQL, machine learning, NLP, LLMs, deep learning frameworks (PyTorch, TensorFlow), data engineering tools (Spark, Hadoop, Airflow), ML Ops platforms (MLflow, Databricks, CI/CD), cloud services (AWS SageMaker, EC2, Redshift), and BI tools such as Tableau, Power BI, and Qlik.

Experience

Corcentric

4 years 10 months

Data Scientist/Analytics Engineer

August 2021 - April 2024 (2 years 9 months)

Chicago, Illinois, United States

- Fine-tuned BERT base model & built multi-classification algorithms to categorize JIRA tickets (F1:

89%), enabling early identification of cases requiring support intervention and increasing team efficiency by 63%.

- Deployed a GenAI solution using RAG to analyze large volumes of business documents, webpages, and Confluence data; designed a chatbot interface that improved customer engagement by 67%.
- Built end-to-end LLM architecture using MLflow in Databricks, ensuring scalable deployment, versioning, and model governance.
- Implemented model monitoring and governance practices, including versioning, performance tracking, and drift detection using MLflow.
- Deployed machine learning models using Databricks, integrating data pipelines with Airflow for scalable processing.
- Designed automated workflows and data pipelines with Airflow, reducing ingestion time by 72% and accelerating ML and reporting for 4M+ monthly records.
- Worked with largescale datasets (millions of records monthly) to build and optimize ML models and data pipelines.
- Designed and executed A/B tests and hypothesis-driven experiments to evaluate model performance, quantify business impact, and guide data-driven decision-making.
- Created a centralized data lake to support analytics and ML use cases; mentored interns and contractors on data engineering and modeling best practices.

Senior Analyst & Data Analyst

July 2019 - August 2022 (3 years 2 months)

Cherry Hill, New Jersey, United States

- Analyzed multi-client spend data and built dashboards in Qlik Sense and Power BI to track spend by region, supplier and product.
- Developed production-ready ML models for customer segmentation and behavior prediction.
- Supported model deployment lifecycle including CI/CD automation and cloud integration.

- Led technical requirements gathering and vendor evaluation for Enterprise Search implementation;
coordinated demos and stakeholder scoring.
- Automated routine processes using Python-based cronjobs, increasing employee efficiency by 56%
and saving 20+ hours weekly.
- Partnered with 10+ stakeholders to identify high-impact analytics projects, leveraging data to
influence key decisions and improving client satisfaction scores by 70%.
- Led four client automation projects using VBA macros, saving 20+ hours weekly in data audit
workflows.

Corcentric

Business Intelligence Intern

June 2018 - March 2019 (10 months)

Cherry Hill, New Jersey, United States

- Built a Python-based data engineering pipeline and developed 30+ KPI visualizations that improved
data quality and supported analytics for multiple business teams.

Tata Consultancy Services

IT Analyst

March 2013 - October 2017 (4 years 8 months)

Bengaluru Area, India

- Synthesized trends into insights and delivered product recommendations using Qlik N-Printing and
QlikView, improving analysis efficiency by 67.8%.
- Built 30+ interactive dashboards in MicroStrategy and developed ETL workflows using Informatica,
increasing data processing efficiency by 76%.

Education

Drexel University's LeBow College of Business

Masters of Science, Business Analytics · (2017 - 2019)

Biju Patnaik University of Technology, Odisha

Bachelor of Technology - BTech, Electronics and Telecommunication Engineering · (August 2008 - September 2012)
